RAVI MAREBOINA

mareboinaravi446@gmail.com | +91 7702943670 | LinkedIn Profile

Professional Summary:

Skilled in creating scalable, responsive applications and delivering seamless user experiences. Experienced collaborating with cross-functional teams to build modern, efficient solutions. I am eager to bring my expertise to a role centered on innovative web development.

Technical Skills:

Frontend Technologies: React JS, JavaScript (ES6+), HTML5, CSS3

Backend Technologies: Node.js, Express and MYSQL.

Version Control: Git, GitHub.

State Management: Context API, Redux, Redux saga.

RESTful APIs: Integration and handling asynchronous operations.

Tools: Webpack, Babel, ESLint

Additional Technologies: Angular, Typescript, React Native, Next JS.

Current Focus: Unit testing with Jest and React Testing Library (RTL).

Professional Experience:

Professional with **3.7 years** of experience at Pronteff IT Solutions (April 2021 – Present), contributing expertise in React.js, full-stack development (MERN Stack).

Projects and Clients:

Orbit Health Care | USA | April 2024 – Present

- Revamped application routing, improving navigation efficiency and enhancing user experience.
- Developed upload and export modules, enabling seamless data transfer and improved workflow automation.
- Built and implemented CMS1500 form, streamlining medical billing processes for faster and more accurate submissions.
- Developed AI-driven document recognizer module, automating document classification and improving processing accuracy.
- Created and optimized Data Import Wizard, simplifying data uploads and ensuring error-free imports for users.

Technologies Used: Material-UI, Ag-Grid, Formik, React-query, Context API, webpack.

Burger King | Mumbai | April 2022 – March 2024

- Developed and integrated Yellow Messenger Chatbot, improving customer support automation and user engagement.
- Implemented a new rating screen to gather user feedback, enhance satisfaction and product insights.
- Built and optimized refresh token functionality, ensuring seamless user authentication and session management.
- Developed a new product listing page, improving product visibility and boosting conversion rates.
- Integrated JusPay and RazorPay Payment Gateway, enabling secure and efficient payment processing.
- Implemented dynamic cancel order time, enhancing flexibility and reducing delays in order cancellations.
- Troubleshot and debugged app issues, ensuring optimal performance and minimizing downtime.
- Optimized application performance, resulting in faster load times and improved user experience.

Technologies Used: Firebase, AUTH, Redux, Redux Saga, Juspay APIs, and SCSS.

Rushividyabhyasam | Hyderabad | April 2021 – March 2022

- Developed two websites (User and Dashboard) for Rushividyabhyasam, enhancing both user experience and administrative control.
- Built the user website with features for course selection, slot booking, payment integration, and location-based pricing, effectively handling a large user base.
- Integrated RazorPay payment systems to support seamless transactions, ensuring secure and efficient payment processing.
- Handled location-based pricing, providing dynamic pricing tailored to users' geographic locations.
- Developed the dashboard with role-based views, offering custom access levels for users and admins.
- Visualized data graphically using charts and graphs, enabling better data interpretation and decision-making.
- Created and managed course content through the dashboard, allowing efficient course management and real-time updates.

Technologies Used: React.js, Typescript, JSX, Razor Pay API, Axios, Chart.js, Bootstrap, RESTful APIs

Education:

Bachelor of Technology in Computer Science, Siddhartha Institute of Engineering & Technology [SIET]

Hyderabad. (B.tech) **(2016 – 2020)**

Certifications:

Node.js, Express, MongoDB & More: The Complete Bootcamp | **Udemy** | 2021

Additional Activities:

- Participating in food distribution drives for the needy and tree-planting initiatives (CSR).
- Contributed blogs to the company's website and engaged employees through poll questions.
